

Textile exhibition counter

1

Remove the print, the worm fence system, the tabletop and the shelf from the transport bag.

2

Unfold the worm fence system by pulling apart the upper corners on the outside. Hold the system in place while you set it up.

3

Attach the upper and lower parts of the framework together providing stability for the stand.

4

Attach the print to the Velcro tape. Start with one of the corners on the front of the system, pull the print tight and stretch it across to the adjacent corner. Continue in this way to fix the entire print to the front of the system.

5

Pull the printed material around the framework until the edges match up with the corners of the framework. Attach it with the velcro.

6

Place the bottom insert facing upwards in the frame.

7

Place the tabletop on the system. Make sure that the Velcro spots on the counter and tabletop are properly aligned over one another in order to prevent the tabletop from slipping.

8

Here is your textile exhibition counter in full size.
